EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims:

Claim 6 has been replaced by the following substitute claim:

---6. (Previously presented) The method of claim 2, wherein the binder is alumina sol.---

Drawings

2. Applicant is invited to submit new drawings in response to this action because the existing drawings do not exhibit any features due to poor copy or scanning quality of photographs. This is not a requirement because the existing drawings have been approved.

Allowable Subject Matter

3. Claims 1-56 are allowed.
4. The following is an examiner's statement of reasons for allowance: The examiner agrees with applicants' characterization of why the instant claims distinguish over the cited prior art. With respect to claim 1 and its dependents, the prior art fails to disclose the steps of blending a carbon that is already activated and calcining the filter body, as defined in the specification, in

Art Unit: 1724

combination with the other steps. With respect to claims 25, 37 and their dependents, the prior art fails to teach the filter element wherein it is constructed and arranged to exhibit a structural failure when saturated with an odorous compound or sulfur. With respect to claim 45 and its dependents, the prior art fails to disclose the use of a fibrous binder having an aspect ratio of between and including about 500:1 and about 700:1 with the activated carbon and metal oxide. With respect to claim 52 and its dependents, the prior art fails to disclose the step of drying the shaped media mixture to a moisture content of about 5-15 wt %. Note that an examiner's amendment was necessary to add a claim identifier to claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached PTO-892 form disclose activated carbon based filters.
